The Kentucky Legislative Research Commission is a 16-member committee that comprises the majority and minority leadership of the Kentucky Senate and House of Representatives. Under Chapter 7 of the Kentucky Revised Statutes, the Commission constitutes the administrative office for the Kentucky General Assembly. Its director serves as chief administrative officer of the legislature when it is not in session. The Commission and its staff, by law and by practice, perform numerous fact-finding and service functions for members of the General Assembly. The Commission provides professional, clerical, and other employees required by legislators when the General Assembly is in session and during the interim period between sessions. These employees, in turn, assist committees and individual members in preparing legislation. Other services include conducting studies and investigations, organizing and staffing committee meetings and public hearings, maintaining official legislative records and other reference materials, furnishing information about the legislature to the public, compiling and publishing administrative regulations, administering a legislative intern program, conducting a presession orientation conference for legislators, and publishing a daily index of legislative activity during sessions of the General Assembly.

The Commission also is responsible for statute revision; publication and distribution of the *Acts* and *Journals* following sessions of the General Assembly; and maintenance of furnishings, equipment, and supplies for the legislature.

The Commission functions as Kentucky's Commission on Interstate Cooperation in carrying out the program of The Council of State Governments as it relates to Kentucky.

Approved by the Public Pension Oversight Board

December 14, 2020

Foreword

The 2013 General Assembly passed Senate Bill 2, which established the Public Pension Oversight Board. The purpose of the board is to review, analyze, and provide oversight to the General Assembly on the benefits, administration, investments, funding, laws, administrative regulations, and legislation pertaining to the state-administered retirement systems. Its work resulted in the policy recommendations reflected within this report.

The board co-chairs would like to thank the board members; all those who attended the board meetings; and those who provided research, testimony, and input to the board.

Summary

The 2013 General Assembly passed Senate Bill 2, which established the Public Pension Oversight Board (PPOB) as a statutory committee. The purpose of the board is to assist the General Assembly with its review, analysis, and oversight of the administration, benefits, investments, funding, laws, administrative regulations, and legislation pertaining to the state-administered retirement systems. The board's oversight functions were initially limited to the Kentucky Retirement Systems (KRS), which administers the Kentucky Employees Retirement System (KERS), the County Employees Retirement System, and the State Police Retirement System (SPRS). However, legislative changes in 2015 expanded the board's oversight functions to include the Teachers' Retirement System (TRS), as well as the Judicial Form Retirement System, which administers the Legislators' Retirement Plan and the Judicial Retirement Plan.

The oversight board met seven times in 2020, and the material covered included overviews of system funding and cash flows, semiannual investment reviews as required by statute, legislative updates and proposals, alternative amortization methods, quasi-governmental participation, health care reciprocity, and CERS separation. A summary of the benefits, funding, investments, and testimony before the Public Pension Oversight Board appears in Chapters 1 to 5 of this publication.

At the December 14, 2020, meeting, the board adopted legislative recommendations for the 2021 Regular Session of the General Assembly. The recommendations appear in detail in Chapter 6 of this publication.

For the 2021 Regular Session of the Kentucky General Assembly, the board approved the following legislative recommendations:

- Convert the Kentucky Employees Retirement System nonhazardous employer contribution amounts from a payroll-based model to a liability-based model.
- Codify the LRC-approved changes requiring actuarial analyses on pension bills to evaluate the impact over a 30-year period, using a standardized format.
- Allow KRS retirees to change beneficiaries after retirement for eligible payment options and to select an adjusted survivorship payment option upon marriage or remarriage.
- Enact the KRS housekeeping measures.
- Enact the TRS housekeeping measures.

Chapter 1

Overview Of Kentucky Retirement Systems Administration And Benefits

Composition Of Kentucky Retirement Systems

The Public Pension Oversight Board has oversight responsibilities for three systems administered by Kentucky Retirement Systems (KRS): the Kentucky Employees Retirement System (KERS), the County Employees Retirement System (CERS), and the State Police Retirement System (SPRS).

Kentucky Employees Retirement System

KERS was established in 1956, and its membership includes employees of state government, nonteaching staff at regional state-supported universities such as Eastern Kentucky University, and employees of local health departments, regional mental health centers, and other quasi-governmental entities. KERS includes both nonhazardous-duty and hazardous-duty benefits and contribution structures. It is governed by Kentucky Revised Statutes 61.510 to 61.705 and Title 105 of the Kentucky Administrative Regulations.

County Employees Retirement System

CERS was established in 1958, and its membership includes employees of city and county governments, police, firefighters, nonteaching staff of local boards of education, circuit clerks, local library employees, and other local government agency employees. CERS includes both nonhazardous-duty and hazardous-duty benefits and contribution structures. It is governed by Kentucky Revised Statutes 78.510 to 78.852 and Title 105 of the Kentucky Administrative Regulations.

State Police Retirement System

SPRS was established in 1958, and its membership includes all uniformed state police officers. SPRS is governed by Kentucky Revised Statutes 16.505 to 16.652 and Title 105 of the Kentucky Administrative Regulations.

These retirement systems—along with other sources of retirement income such as personal retirement accounts, postretirement employment, or Social Security, if applicable—serve as the basis for providing income to state and local public employees during their retirement years.

Kentucky Retirement Systems Administration

Statute provides that a 17-member board of trustees oversee the administration of KRS, with 6 trustees being elected by the membership, 10 being appointed by the governor, and 1 being the secretary of the Personnel Cabinet. The six elected trustees include two elected by the KERS membership, three elected by the CERS membership, and one elected by the SPRS membership. Of the 10 trustees appointed by the governor, 6 must have at least 10 years of investment experience as defined by statute, 1 must be knowledgeable about the effects of pensions on local governments, and 3 are selected from lists submitted by the Kentucky League of Cities, the Kentucky Association of Counties, and the Kentucky School Boards Association. Elected and appointed trustees serve 4-year terms and may serve no more than three consecutive terms.

The board annually elects a chair and vice chair, and the chair appoints members to various committees of the board, including the investment committee, insurance committee, governance and audit committees, legislative committee, personnel committee, and special committee on benefits and funding. Table 1.1 shows the current composition of the board. The board appoints an executive director to oversee day-to-day operations and to staff the needs of the systems. The current executive director is David Eager, and as of June 30, 2020, KRS consisted of 243 full-time employees and 3 part-time employees.

Kentucky Retirement Systems Employer And Employee Membership

As of June 30, 2020, 335 agencies participated in KERS and 1,132 agencies participated in CERS. For both systems, state statute defines the types of agencies that are eligible for participation, with final approval in the process being granted or denied by the KRS board. In the case of KERS, an executive order declaring the agency eligible for participation is required, while CERS agencies must meet statutory definitions in order to participate (the board determines whether the agency meets the definition). Once an agency begins participating, it is not allowed to discontinue participation unless it is eligible to voluntarily discontinue participation or is required to discontinue participation by the systems. If an agency discontinues participation, it must pay the cost for leaving the system.

All regular full-time employees hired after the agency's participation date are required to contribute to the systems. For KERS and CERS, the term *regular full-time employee* means an employee who averages 100 hours of work per month over a calendar or fiscal year, except that a school board employee is required to average 80 hours per month over the months represented by the days worked.^a All regular full-time state police officers participate in SPRS. Table 1.2 provides, by system, the number of employees (often referred to as active members), former employees with accounts but not retired (often referred to as inactive members), and retired members.

Table 1.2
Number Of Active, Inactive, And Retired Members, By System
June 30, 2020

System	Members			Total
	Active	Inactive	Retired	
CERS nonhazardous	83,458	90,673	60,877	235,008
CERS hazardous	9,350	2,924	8,431	20,705
KERS nonhazardous	31,190	48,583	43,592	123,365
KERS hazardous	4,112	5,838	3,242	13,192
SPRS	798	349	1,523	2,670
Total	128,908	148,367	117,665	394,940

Note: CERS = County Employees Retirement System; KERS = Kentucky Employees Retirement System; SPRS = State Police Retirement System.

Source: June 30, 2020, KRS Comprehensive Annual Financial Report.

KRS Employee Participation Requirements

Employees earn service credit for months and days worked in regular full-time positions. With the exception of school board employees, all employees earn 1 month of service credit in the systems for every month worked in a regular full-time position. School board employees working in regular full-time positions earn service credit based on their days worked, with

^a Certain exceptions apply to the regular full-time requirement such as seasonal, temporary, and interim positions that are not subject to the participation requirements. However, statute limits the duration and frequency of use of these positions by agencies.

180 days worked in a regular full-time position equaling 12 months of service credit (less service credit is given for days worked fewer than 180).

Within KERS and CERS, there are both nonhazardous-duty and hazardous-duty benefit and contribution structures. For a job to be classified as hazardous duty, it must meet the definition and requirements established by state law, the employing agency must request hazardous-duty coverage for the position and agree to pay the higher employer contribution rates, and the KRS board of trustees must review and adopt the position as hazardous. In general, hazardous-duty positions in KERS and CERS primarily cover police, fire, emergency medical services, and corrections employees.

Retirement Eligibility

Employees must meet certain age or service credit requirements before they can retire and begin receiving benefits. In KRS, the retirement eligibility requirements vary based on type of coverage (nonhazardous-duty or hazardous-duty) and the date the employee first began participating in the systems. Table 1.3 shows eligibility requirements for nonhazardous-duty employees, and Table 1.4 shows eligibility requirements for hazardous-duty employees. Both tables show the requirements to earn an unreduced benefit (no penalties) and the requirements for a reduced benefit (penalties are actuarially determined and based on how many years the employee is short of reaching an unreduced benefit).

Table 1.3
Retirement Eligibility Requirements For KERS/CERS Nonhazardous Members

Participation Date	Unreduced Benefit	Reduced Benefit
Prior to Sept. 1, 2008	<ul style="list-style-type: none"> Any age with at least 27 years of service or Age 65 with at least 4 years of service 	<ul style="list-style-type: none"> Any age with at least 25 years of service or Age 55 with at least 5 years of service
On or after Sept. 1, 2008, but prior to Jan. 1, 2014	<ul style="list-style-type: none"> Must meet rule of 87 (age + service = 87) and be at least 57 years of age or Age 65 with at least 5 years of service 	Age 60 with at least 10 years of service
On or after Jan. 1, 2014	<ul style="list-style-type: none"> Must meet rule of 87 (age + service = 87) and be at least 57 years of age or Age 65 with at least 5 years of service 	No reduced benefit provisions

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System.

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System.

Source: Kentucky Retirement Systems.

System Benefits

Each system is designed to provide three types of benefits: a monthly retirement benefit for life, disability/death benefits, and health insurance benefits after retirement. Benefits vary based on type of coverage (nonhazardous-duty or hazardous-duty) and the date the employee first began participating in the system. The following pages provide information on each of these benefits.

Monthly Retirement Benefits For Members Participating Prior To January 1, 2014

Benefits for members who began participating in the systems prior to January 1, 2014, are based on the following formula established by statute:

$$\text{Final compensation} \times \text{Benefit factor} \times \text{Years of service credit} = \text{Annual benefit}$$

Tables 1.5 to 1.8 provide retirement benefit calculations for members under this formula.

Table 1.5
Retirement Benefit Calculation For KERS/CERS Nonhazardous Employees
Participating Prior To September 1, 2008

Final Compensation	Benefit Factor	Service Credit
Average of highest 5 fiscal years of salary	<ul style="list-style-type: none"> KERS: 1.97 percent, except that the value is 2 percent for employees with 13 months of service between January 1998 and January 1999 CERS: 2.2 percent if participating prior to Aug. 1, 2004; 2 percent if participating on or after Aug. 1, 2004, but prior to Sept. 1, 2008 	Service earned for time worked in regular full-time position, purchased service, and service credit for accumulated sick leave at retirement

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System.

Participating On Or After September 1, 2008, But Prior To January 1, 2014

Final Compensation	Benefit Factor		Service Credit
	Years Of Service	Factor	
Average of highest 3 complete fiscal years of salary	10 or less	1.30%	Service earned for time worked in a regular full-time position, purchased service, and up to 12 months of service credit for accumulated sick leave at retirement
	More than 10, but no more than 20	1.50	
	More than 20, but less than 25	2.25	
	25 or more	2.50	

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System.

Source: Kentucky Retirement Systems.

The annual benefit resulting from the calculations in Tables 1.5 to 1.8 is paid to the retiree in monthly installments. At retirement, a retiree may choose to take a reduced benefit to provide a monthly benefit to a beneficiary upon death, either for a period certain or for the life of the beneficiary.

Retirement Benefit Calculation For Members Participating On Or After January 1, 2014

Members who began participating in the systems on or after January 1, 2014, are provided retirement benefits through a cash balance plan that provides benefits based on an account balance, rather than on a formula. This change was enacted in Senate Bill 2, during the 2013 Regular Session.

The cash balance plan is not a defined contribution plan, but rather a defined benefit plan that operates as another benefit tier within the retirement systems. Although it is a type of defined benefit plan, it does have several characteristics of a defined contribution plan with individual member accounts, benefits based on the member's account balance at retirement (member and employer contributions and investment returns), and some variability in benefits due to investment returns. It differs from a defined contribution plan in that a minimum level of investment return is guaranteed on the member accounts, the retirement systems rather than the employee manage investments, and members can annuitize their account balance upon retirement (to receive it in the form of a monthly benefit).

In the cash balance plan, employees contribute the same amount as newer employees, who began participating prior to January 1, 2014, except that the 5 percent of pay (8 percent hazardous-duty) they contribute to fund pension benefits goes into their individual accounts, along with an employer pay credit of 4 percent of their salary (7.5 percent hazardous-duty). Employees receive a guaranteed return of 4 percent annually and 75 percent of the excess returns above 4 percent (the excess returns are calculated on a 5-year smoothed return). Former or inactive employees, who did not contribute to the cash balance plan during the year, receive a 4 percent interest credit. Table 1.9 shows total interest earned and credited for cash balance members over the past 5 fiscal years.

Table 1.9
Interest Earned And Credit For Cash Balance Plan, By System

System/Plan	2016	2017	2018	2019	2020
KERS nonhazardous	4.83%	6.56%	6.00%	4.58%	4.97%
KERS hazardous	4.99	6.99	6.65	5.21	5.15
CERS nonhazardous	4.87	6.89	6.54	5.13	4.57
CERS hazardous	5.01	7.05	6.75	5.34	5.07
SPRS	4.83	6.69	6.21	4.79	4.85

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System.

Source: Kentucky Retirement Systems.

Employees in the cash balance plan are vested for employer contributions and investment returns on those employer contributions after 5 years. Upon reaching retirement eligibility, employees can take their account balance in a lump sum or have it annuitized into one of the monthly benefit payment options currently available through the retirement systems for other members.

Retiree Health Insurance Benefits

The systems also provide access to group rates and medical insurance for retired members, spouses, and dependents. Coverage for retirees not eligible for Medicare is provided through the Kentucky Employees' Health Plan, the same health plan provided to state and school board employees. Coverage for Medicare-eligible retirees is provided through a plan administered by or contracted through KRS, which then coordinates with Medicare for delivery of health benefits.

As provided by statute, the systems also subsidize medical coverage for the retiree and in some cases for the dependents of the retiree, most often if the member retires with hazardous-duty service credit. In general, employees participating prior to July 1, 2003, receive a percentage of the premium paid upon retirement based on their service credit, while employees who begin participating after that date receive a set dollar amount per month for each year of service credit. Tables 1.10 and 1.11 provide details about the benefits for nonhazardous-duty and hazardous-duty members based on their participation dates.

For plan year 2021, the maximum retiree health subsidy for a nonhazardous retiree with 20 years of service who began participating prior to July 1, 2003, is \$732.26 per month in the Kentucky Employees' Health Plan and \$252.51 per month for the Medicare-eligible plan. For a hazardous-duty retiree on a family plan in the Kentucky Employees Health Plan, the maximum subsidy is \$1,841.08 per month.

Table 1.10
Retiree Health Insurance Premium Payments For KERS/CERS Nonhazardous Members

Participation Date In Systems	Eligibility Requirements	Percent Or Dollars Of Premium Paid For Retiree	
Before July 1, 2003	Must be drawing monthly benefit	Years Of Service At Retirement	% Of Premium Paid For Retiree
		Less than 4	0%
		4, but less than 10	25
		10, but less than 15	50
		15, but less than 20	75
		20 or more	100
On or after July 1, 2003, but prior to Sept. 1, 2008	Must be drawing monthly benefit and must have at least 10 years of service	\$10 per month paid toward health premium for each year of earned service. Amount is adjusted by 1.5% annually from date of participation.	
On or after Sept. 1, 2008	Must be drawing monthly benefit and must have at least 15 years of service	\$10 per month paid toward health premium for each year of earned service. Amount is adjusted by 1.5% annually from date of participation.	

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System.

Table 1.11
Retiree Health Insurance Premium Payments
For KERS/CERS Hazardous-Duty And SPRS Members

Participation Date In Systems	Eligibility Requirements	Percent Or Dollars Of Premium Paid For Retiree And Dependents Of Retiree		
Before July 1, 2003	Must be drawing monthly benefit	Years Of Service At Retirement	% Paid For Retiree	% Paid For Dependents
		Less than 4	0%	0%
		4, but less than 10	25	25
		10, but less than 15	50	50
		15, but less than 20	75	75
		20 or more	100	100
On or after July 1, 2003, but prior to September 1, 2008	Must be drawing monthly benefit and must have at least 10 years of service	\$15 per month paid toward health premium for each year of earned service. Upon death of retiree, surviving spouse receives \$10 per month paid toward health premium for each year of earned hazardous-duty service credit. Amounts are adjusted by 1.5% annually from date of participation.		
On or after September 1, 2008	Must be drawing monthly benefit and must have at least 15 years of service	\$15 per month paid toward health premium for each year of earned service. Upon death of retiree, surviving spouse receives \$10 per month paid toward health premium for each year of earned hazardous-duty service credit. Amounts are adjusted by 1.5% annually from date of participation.		

Note: Percent/dollar amount paid on behalf of a hazardous-duty retiree's spouse/dependents is based solely on the retiree's hazardous service at retirement. KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System.
Source: Kentucky Retirement Systems.

Disability And Death Benefits

Like most defined benefit plans, the systems provide benefits for those employees who become disabled or who die prior to retirement, including in-the-line-of-duty disability and death benefits. After retirement, the benefits left to the retiree's beneficiary vary based on the payment option selected at retirement. For example, a retiring employee may elect to provide a lifetime benefit to a surviving spouse upon the employee's death by taking an actuarially reduced monthly benefit. In addition, the systems provide a \$5,000 lump-sum death benefit for members who retire with at least 4 years of service.

Cost Of Living Adjustments On Monthly Retirement Benefits

After the passage of SB 2 in the 2013 Regular Session of the General Assembly, members of the systems no longer receive automatic annual increases of 1.5 percent on their monthly retirement benefits. Language in SB 2 did provide that a 1.5 percent cost of living adjustment (COLA) could be granted

- if an individual system is 100 percent funded and subsequent legislation authorizes the use of surplus funds to provide the 1.5 percent COLA, or
- if the General Assembly appropriates or directs payment of funds to prefund the COLA in the year it is provided.

Service Purchases And Sick Leave Service Credit

Many employees participating in the systems can choose to purchase service credit for other public employment or service as established by law, such as military service, federal service, university service, and nonqualified service, provided certain requirements established by state statute are met. In addition, employees of KERS/SPRS agencies and many CERS agencies receive additional service credit for accumulated sick leave at retirement. The costs for sick leave service credit are paid by the last participating employer.

Legislative changes in 2002, 2004, 2008, and 2013 have limited the use and impact on retirement eligibility of service purchases and sick leave service credit, particularly for new participants in the systems. The most recent changes in 2013 via SB 2 eliminated service purchases and sick leave service credit for new participants entering the system on or after January 1, 2014, with the exception of omitted service and recontributions of refunds.

Reemployment After Retirement

State statute places restrictions on retirees returning to work after retirement with a participating KRS employer. As a result of House Bill 1, passed during the 2008 Special Session, the following restrictions and requirements apply to employees who retire and return to work on or after September 1, 2008.

Required Break In Employment

The employee must have a 3-month break in employment before returning to any position with an employer participating in the systems, except that hazardous-duty KERS or CERS and SPRS retirees who return to work in a full-time hazardous-duty position are required to observe only a 1-month break in employment. If the break is not observed, the employee's retirement is voided and all benefit payments issued in error shall be repaid to the systems. Both the employee and employer must certify that no prearranged agreement for the employee to return to work existed prior to the employee's retirement. For elected officials, a reelection to the same office is considered a prearranged agreement if the official retires following the election but prior to taking office.

How It Works For The Employee

Provided the break is observed, the employee can return to work and draw a pension, but will not contribute to the systems or earn a second pension.

How It Works For The Employer

If the employee has returned to work in a position that would have qualified for participation in the systems, the employer is required to pay contributions to the systems and to reimburse the systems for the cost of health insurance premiums paid by the systems for the retiree (not to exceed the cost of the single premium). If the employee takes health coverage through the

employer and waives coverage with the systems, then no reimbursement is required. However, since HB 1 in 2009, the General Assembly has passed several exemptions to the required employer contributions and health reimbursements for qualifying deputy sheriffs, city police officers, university police officers, and school safety officers, while also exempting the required health reimbursements for classified school board employees, who work less than 80 days per year.

Reciprocity

Members who have service in more than one retirement plan administered by the Commonwealth of Kentucky can combine service in the plans to determine eligibility for retirement and final compensation (years of highest salary). Each system will pay a benefit based on the amount of service in that system.

Taxation Of Benefits

Monthly benefits from all systems are subject to federal income tax. If a member made contributions with after-tax dollars (usually service purchases), then a portion of the monthly benefit at retirement will not be subject to federal income tax.

All benefits attributable to service earned on or before December 31, 1997, are exempt from Kentucky income tax. The portion of the member's benefits earned on or after January 1, 1998, is subject to Kentucky income tax. However, an annual pension exclusion of \$31,110 applies to this portion and to other retirement income sources.

2020 Legislative Changes

Four measures that directly affected KRS plans were passed during the 2020 Regular Session: Senate Bills 239 and 249 and House Bills 271 and 484.

- SB 239 allows mayors and other members of a city legislative body who are age 62 and above to retire and begin drawing a benefit without simultaneously retiring from their city office. However, they would not build any further retirement service credit for this extended time in office. The bill also provides that cities may reemploy as many retired police officers as they deem necessary, but the city is excused from paying employer contributions and insurance premiums for only a certain, limited number of these reemployed retirees. If the number is exceeded, the city is responsible for paying contributions on the rest of the retired officers it employs.
- SB 249 resets the amortization period for paying off the unfunded liabilities for all KRS plans to a new 30-year period effective with the 2019 valuation and established a layered amortization method for the systems, requiring any increase or decrease in the actuarially accrued liability after the 2019 valuation to be amortized over separate 20-year closed periods. The Act also extended the window for state universities and quasi-governmental employers with employees in the KERS nonhazardous plan to voluntarily cease participation

from June 20, 2020, to June 30, 2021, and paused the CERS employer rate phase-in at its current level for a 1-year period.

- HB 271 removed language that reduced in-the-line-of-duty or duty-related death benefits for surviving spouses upon remarriage and directed KRS to increase the monthly benefits for surviving spouses who remarried prior to the effective date of the Act or were otherwise impacted by the deleted language. The Act also directed KRS to establish a process for a surviving spouse of a member who died prior to retirement and prior to April 13, 2018, to apply for in-the-line-of-duty benefits.
- HB 484 restructures the Kentucky Retirement Systems' governance of its underlying plans, separating CERS governance from the KRS board of trustees to a new nine-member CERS board of trustees established by the Act. The KRS board will be reconstituted as a nine-member board governing the KERS and the SPRS. The Act establishes the Kentucky Public Pensions Authority (KPPA), which will administer the day-to-day administrative and operational needs of all the systems. The Act takes effect on April 1, 2021.

Chapter 2

Overview Of Teachers' Retirement System Administration And Benefits

Composition Of Teachers' Retirement System

The Public Pension Oversight Board has oversight responsibilities for the Teachers' Retirement Systems (TRS). TRS is the oldest statewide pension fund in Kentucky, established by the 1938 General Assembly. TRS administers pension, retiree health insurance, and life insurance benefits to certified employees of local school districts and to employees of higher education agencies, educational cooperatives, and other public educational agencies. It is governed by Kentucky Revised Statutes 161.220 to 161.716 and Title 102 of the Kentucky Administrative Regulations.

TRS includes both university and nonuniversity benefit and contribution rate structures, with the majority of nonuniversity membership coming from certified employees of local school districts. University employees include teaching and administrative staff of regional state-supported universities and the community college employees of the Kentucky Community and Technical College System (KCTCS). Nonuniversity employees do not participate in or earn benefits from Social Security while working in a TRS-eligible position. University employees do participate and earn benefits in Social Security while working in a TRS-eligible position.

TRS—along with other sources of retirement income such as personal retirement accounts, postretirement employment, or Social Security, if applicable—serves as the basis for providing income to TRS employees during their retirement years.

TRS Administration

As provided by statute, an 11-member board of trustees oversees the administration of TRS, with 7 trustees being elected by the membership, 2 being appointed by the governor, 1 being the state treasurer, and 1 being the commissioner of education. The seven elected trustees include four active members, one retired member, and two “lay trustees” who are outside of the teaching profession. The two trustees appointed by the governor must have at least 10 years of investment experience as defined by statute. Elected and appointed trustees serve 4-year terms and may serve no more than three consecutive terms.

The board annually elects a chair and vice chair, and the chair appoints members to various committees of the board, including the investment committee, insurance committee, governance and audit committees, legislative committee, personnel committee, and special committee on benefits and funding. Table 2.1 shows the current composition of the board. The board appoints an executive secretary to oversee day-to-day operations and to staff the needs of the system. The current executive secretary is Gary Harbin, and as of June 30, 2020, TRS consisted of 101 full-time employees and 8 part-time employees.

Table 2.1
Teachers' Retirement System Board Of Trustees
December 2020

Member Name	Appointment/Election
Alison Wright, chair	Elected active teacher
Hollis Gritton, vice chair	Elected lay trustee
Lynn Patterson	Elected active teacher
Laura Schneider	Elected active teacher
Josh Underwood	Elected active teacher
Brenda McGown	Elected retired teacher
William Alverson	Elected lay trustee
John Boardman	Governor appointee
Frank Collecchia	Governor appointee
Jason Glass	Commissioner of education
Allison Ball	State treasurer

Source: Teachers' Retirement System.

TRS Employer And Employee Membership

As of June 30, 2020, 207 employers participated in TRS, including 173 local school districts, 14 state agencies, 6 higher education agencies that include regional state-supported universities and KCTCS, 8 educational cooperatives, and 6 other educational organizations. State statute lists the agencies that are required to participate in TRS.

Table 2.2 provides the number of employees (often referred to as active members), former employees with accounts but not retired (often referred to as inactive members), and retired members of TRS. School district employees constitute more than 92 percent of the active members participating in TRS.

Table 2.2
Number Of Active, Inactive, And Retired Members Of TRS
June 30, 2020

System	Active Members	Inactive Members	Retired Members	Total
TRS	73,151	56,748	56,629	186,528

Source: June 30, 2020, TRS Actuarial Valuation.

TRS Employee Participation Requirements

For nonuniversity employees, participation is mandatory for full-time positions with a TRS employer that require certification or graduation from a 4-year college. *Full-time* is defined as employment in a position that requires services on a continuing basis equal to at least seven-tenths of the normal full-time contract for any fiscal year. Employees of nonuniversity employers providing part-time or substitute teaching services are also required to participate in TRS.

For university employees, participation is optional for full-time positions with a TRS employer that require certification or graduation from a 4-year college.

Retirement Eligibility

Employees must meet certain age or service credit requirements before they can retire and begin receiving benefits. In TRS, the retirement eligibility requirements vary based on the date the employee first began participating in the system. Table 2.3 shows eligibility requirements for TRS members to earn an unreduced benefit (no penalties) and the requirements for a reduced benefit (penalties are based on how many years the employee is short of reaching an unreduced benefit).

Table 2.3
Retirement Eligibility Requirements For Teachers' Retirement System

Participation Date	Unreduced Benefit	Reduced Benefit
Prior to Sept. 1, 2008	<ul style="list-style-type: none"> Any age with at least 27 years of service or Age 60 with at least 5 years of service 	Age 55 with at least 5 years of service; reduction set by statute of 5% per year
On or after Sept. 1, 2008	<ul style="list-style-type: none"> Any age with at least 27 years of service or Age 60 with at least 5 years of service 	Age 55 with at least 10 years of service; reduction set by statute of 6% per year

Source: Teachers' Retirement System.

System Benefits

TRS is designed to provide three types of benefits: a monthly retirement benefit for life, disability/death benefits, and health insurance benefits after retirement. Benefits vary based on the date the employee first began participating in the system. Information on each of these benefits appears on the following pages.

Monthly Retirement Benefits For Members

Pension benefits for system members provide a percentage of the employee's salary at retirement for each year of service credit. This is the formula for calculating the benefit:

$$\text{Final average salary} \times \text{Benefit factor} \times \text{Years of service credit} = \text{Annual benefit}$$

Tables 2.4 and 2.5 show retirement benefit calculations for members under this formula.

Table 2.4
Retirement Benefit Calculation For TRS Nonuniversity Employees

Final Average Salary	Participation Date/Benefit Factor	Service Credit
<ul style="list-style-type: none"> • Average of the highest 5 years of salary or • Average of the highest 3 years of salary if the member is age 55 or more with at least 27 years of service credit 	<p>Prior to July 1, 2002:</p> <ul style="list-style-type: none"> • 2.0% for service credit prior to July 1, 1983 • 2.5% for service credit on or after July 1, 1983 • 3.0% for service credit in excess of 30 years* <p>On or after July 1, 2002, but prior to July 1, 2008:</p> <ul style="list-style-type: none"> • 2.0% if service credit is less than 10 years • 2.5% if service credit is more than 10 years • 3.0% for service credit in excess of 30 years* <p>On or after July 1, 2008:</p> <ul style="list-style-type: none"> • 1.70% if service credit is 10 years or less • 2.00% if service credit is more than 10 years, but not more than 20 years • 2.30% if service credit is more than 20 years, but not more than 26 years • 2.50% if service credit is more than 26 years, but not more than 30 years • 3.0% for service credit in excess of 30 years* 	Earned service; purchased service

Note: TRS = Teachers' Retirement System.

*The 3.0 percent benefit factor applies only to service above 30 years of service credit.

Source: Teachers' Retirement System.

Table 2.5
Retirement Benefit Calculation For TRS University Employees

Final Average Salary	Participation Date/Benefit Factor	Service Credit
<ul style="list-style-type: none"> • Average of the highest 5 years of salary or • Average of the highest 3 years of salary if the member is age 55 or more with at least 27 years of Kentucky service credit 	<p>Prior to July 1, 2008:</p> <ul style="list-style-type: none"> • 2.0% <p>On or after July 1, 2008:</p> <ul style="list-style-type: none"> • 1.50% if service credit is 10 years or less • 1.70% if service credit is greater than 10 years, but not more than 20 years • 1.85% if service credit is greater than 20 years, but not more than 26 years • 2.0% if service credit is 27 or more years 	Earned service; purchased service; sick leave service credit

Note: TRS = Teachers' Retirement System.

Source: Teachers' Retirement System.

The annual benefit resulting from the calculations in Tables 2.4 and 2.5 is paid to the retiree in monthly installments. At retirement, a retiree may choose to take a reduced benefit to provide a monthly benefit to a beneficiary upon death, either for a period certain or for the life of the beneficiary.

Retiree Health Insurance Benefits

TRS also provides access to group rates and medical insurance for retired members and their spouses and dependents. Coverage for retirees ineligible for Medicare is provided through the Kentucky Employees' Health Plan, the same health plan provided to state and school board employees. Coverage for Medicare-eligible retirees is provided through a plan administered or contracted through TRS, which then coordinates with Medicare for delivery of health benefits.

As provided by statute, the system also subsidizes medical coverage for the retiree. However, the level of subsidy is determined by the TRS board of trustees based on the availability of funding.

Table 2.6 details the percentage of retiree health subsidy provided for TRS members based on years of service. In 2020, the maximum retiree health subsidy on a single plan is \$531.34 per month in the Kentucky Employees' Health Plan and \$178 per month for the Medicare-eligible plan.

Table 2.6
Percentage Of Retiree Health Insurance Subsidy Paid For TRS Members

Years Of Service	Retired And Age 65 By 1/1/2005	Participation Date		
		Prior To 7/1/2002	On Or After 7/1/2002 But Prior To 7/1/2008	On Or After 7/1/2008
Less than 5	0%	0%	0%	0%
5, but less than 10	70	25	10	0
10, but less than 15	80	50	25	0
15, but less than 20	90	75	45	45
20, but less than 25	100	100	65	65
25, but less than 26	100	100	90	90
26, but less than 27	100	100	95	95
27 or more	100	100	100	100

Note: TRS = Teachers' Retirement System.

Source: Teachers' Retirement System.

HB 540, which was passed during the 2010 Regular Session to address retiree health funding issues, increased employee contributions, employer contributions, and state appropriations. The legislation also provided that retirees not eligible for Medicare were required to pay the equivalent of the Medicare Part B premium toward their costs of coverage in the Kentucky Employees' Health Plan, in addition to any other costs required by the plan.

Disability And Death Benefits

Like most defined benefit plans, the system provides benefits for those employees who become disabled or who die prior to retirement, including in-the-line-of-duty disability and death benefits as well as minimum benefits payable to the surviving spouse and dependents. After retirement, the benefits left to the retiree's beneficiary vary based on the payment option selected at retirement. For example, retiring employees may elect to provide a lifetime benefit to a surviving spouse upon the employee's death by taking an actuarially reduced monthly benefit. In addition, the system provides a \$5,000 life insurance benefit for members who retire under service or

disability retirement provisions. A \$2,000 life insurance benefit is provided for active members prior to retirement.

Cost Of Living Adjustments On Monthly Retirement Benefits

A 1.5 percent annual automatic cost of living adjustment is provided each July to retirees who have been retired at least 12 months, with a pro rata increase provided to retirees who have been retired less than 12 months. In the past, legislative action has created additional ad hoc COLAs; the last one, in 2007, provided an additional 0.6 percent increase in monthly benefits. Costs for prior ad hoc cost of living adjustments are being financed over time with direct appropriations to TRS.

Service Purchases And Sick Leave

Employees participating in TRS can choose to purchase service credit for other public employment or service as established by law (such as military service, federal Head Start service, out-of-state service, and nonqualified service) provided that certain requirements established by state statute are met.

School districts may choose to compensate retiring employees for up to 30 percent of their accumulated sick leave, which is then included in the member's final average salary, or the districts may choose to convert accumulated sick leave to service credit for the employee. Currently, all school districts choose to compensate for accumulated sick leave at retirement. All other employers may choose to convert accumulated sick leave to service credit for their retiring employees. Retirement costs for the inclusion of school districts' payments for sick leave are primarily financed over time with direct state appropriations, and costs to convert sick leave to service credit by other employers are paid by the individual employer.

Reemployment After Retirement

State statute places restrictions on retirees returning to work after retirement with a participating employer of TRS. The restrictions are different for regional state-supported universities and KCTCS than for all other employers.

Except in the case of reemployment with regional state-supported universities and KCTCS, employees who wish to return to work may do so under the following options:

- **Pension Waiver.** Retirees can waive their pension and return to work. During the period of reemployment, additional service and salary is earned, and their benefit is recomputed upon subsequent retirement.
- **Part-Time Program.** Retirees can return to work part time after 3 months, retain their pension, and contribute to a second account (part time is no more than 69 percent of the average contract period). If their salary exceeds the daily wage threshold (65 percent of their

last annual compensation if they retired with less than 30 years, and 75 percent if they retired with 30 or more years), then their pension benefit is decreased by a corresponding amount.

- **Full-Time Program.** Retirees can return to work full time, retain their pension, and contribute to a second account. The required break in employment is 3 months if returning to work for a different school district, or 12 months if returning to work in the same school district. If their salary exceeds the daily wage threshold (65 percent of their last annual compensation if they retired with less than 30 years, and 75 percent if they retired with 30 or more years), then their pension benefit is decreased by a corresponding amount. The full-time program is limited to 3 percent of the agency's employees participating in the system.
- **Critical Shortage Program.** This program is the same as the full-time program, except that there are no salary limitations and it is limited to 1 percent of the agency's employees participating in the system.

For reemployment with a regional state-supported university and KCTCS, employees who wish to return to work may do so under the following options:

- **Pension Waiver.** Retirees can waive their pension and return to work. During the period of reemployment, additional service and salary is earned and their benefit is recomputed upon subsequent retirement.
- **Part-Time Program.** Retired employees can return to work immediately (no break) in a part-time position (up to 12 semester hours if teaching or 100 days if in an administrative nonteaching position) while retaining their pension but will not contribute to a second account. If employees exceed the part-time threshold hours or days, their pension will be reduced by the dollar amount earned in excess of the threshold.
- **Full-Time Program.** Retired employees can return to work full-time and retain their pension if they observe a 6-month break in employment. The employees will not contribute to TRS but will instead contribute to the Optional Retirement Plan, a defined contribution plan administered by the university.

Reciprocity

Members who have service in more than one retirement plan administered by the Commonwealth of Kentucky can combine service in the plans to determine eligibility for retirement and final average salary (years of highest salary). Each system will pay a benefit based on the amount of service in that system.

Taxation Of Benefits

Monthly benefits from all systems are subject to federal income tax. If a member made contributions with after-tax dollars (usually service purchases), then a portion of the monthly benefit at retirement will not be subject to federal income tax.

All benefits attributable to service earned on or before December 31, 1997, are exempt from Kentucky income tax. The portion of the member's benefits earned on and after January 1, 1998,

is subject to Kentucky income tax. However, an annual pension exclusion of \$31,110 applies to this portion and to other retirement income sources.

2020 Legislative Changes

No measures that directly affected the Teachers' Retirement System were passed during the 2020 Regular Session.

Chapter 3

Overview Of Judicial Form Retirement System Administration And Benefits

Composition Of Judicial Form Retirement System

The Public Pension Oversight Board has oversight responsibilities for two retirement plans administered by the Judicial Form Retirement System (JFRS): the Legislators' Retirement Plan (LRP) and the Judicial Retirement Plan (JRP).

Judicial Retirement Plan

JRP was established in 1960, and its membership includes justices of the Supreme Court and judges of the Court of Appeals, Circuit Court, Family Court, and District Court. It is governed by Kentucky Revised Statutes 21.345 to 21.580 and Title 4 of the Kentucky Administrative Regulations.

Legislators' Retirement Plan

LRP was established in 1980 for members of the General Assembly. It is governed by Kentucky Revised Statutes 6.500 to 6.577 and Title 4 of the Kentucky Administrative Regulations.

These retirement plans—along with other sources of retirement income such as personal retirement accounts, postretirement employment, or Social Security, if applicable—serve as the basis for providing income to members during their retirement years.

Judicial Form Retirement System Administration

As provided by statute, an eight-member board of trustees oversees the administration of JFRS, with three trustees appointed by the Supreme Court, two appointed by the governor, one appointed by the speaker of the House of Representatives, one appointed by the president of the Senate, and one appointed jointly by the president and speaker. Gubernatorial appointees cannot be members or benefit recipients of the plans and must have at least 10 years of investment experience as defined by statute. Elected and appointed trustees serve 4-year terms and may serve no more than three consecutive terms.

The board annually elects a chair and has separate investment committees for each plan as provided by statute. The JRP investment committee consists of board trustees appointed by the Supreme Court and governor. The LRP investment committee consists of board trustees appointed by the speaker of the House, the president of the Senate, and the governor.

Table 3.1 shows the current composition of the board. The board appoints an executive director to oversee day-to-day operations and to staff the needs of the system. The current executive

director is Bo Cracraft, and as of December 1, 2020, JFRS consisted of two full-time employees and one part-time employee.

Table 3.1
Judicial Form Retirement System Board Of Trustees
December 2020

Member Name	Appointed By
Judge John R. Grise, chair	Supreme Court
Justice Daniel J. Venters	Supreme Court
Judge Douglas M. George	Supreme Court
Judge Tom Jensen	Speaker of House and President of Senate
Rep. Brad Montell	Speaker of House
Sen. Joe Bowen	President of Senate
AC Donahue	Governor
Stephen F. LeLaurin	Governor

Source: Judicial Form Retirement System.

Judicial Form Retirement System Employer And Employee Membership

Membership in JRP and LRP is limited to judges and legislators, respectively. Participation in JRP and LRP is not automatic, and a newly elected judge or legislator must opt to participate in JRP or LRP within 30 days of taking office. A judge or legislator who fails to elect participation will participate in the Kentucky Employees Retirement System, the same system covering state employees. Members who began participating prior to January 1, 2014, whose accrued benefit is equal to 100 percent of final compensation, the maximum benefit payable by statute, may elect to cease participating in JRP or LRP and begin participating in KERS.

Table 3.2 shows, by plan, the number of contributing members (often referred to as active members), former contributing members with accounts who are not yet retired (often referred to as inactive members), and retired members.

Table 3.2
Number Of Active, Inactive, And Retired Members By Plan
June 30, 2020

System	Active Members	Inactive Members	Retired Members	Total
LRP	54	38	241	333
JRP	188	12	352	552
Total	255	53	592	900

Note: LRP = Legislators' Retirement Plan, Defined Benefit Plan; JRP = Judicial Retirement Plan, Defined Benefit Plan. In addition, 44 individuals participate in the hybrid cash balance plan of the JRP and 48 individuals participate in the hybrid cash balance plan of the LRP.

Source: Judicial Form Retirement System Audit Report, June 30, 2020.

Retirement Eligibility

Plan members must meet certain age or service credit requirements before they can retire and begin receiving benefits. For JRP and LRP, the retirement eligibility requirements vary based on the date the member first began participating in the plans. Table 3.3 shows eligibility requirements for plan members to earn an unreduced benefit (no penalties) and the requirements for a reduced benefit (penalties are set by statute and vary based on how many years the employee is short of reaching an unreduced benefit).

Table 3.3
Retirement Eligibility Requirements For JRP And LRP Members

Participation Date	Unreduced Benefit	Reduced Benefit**
Prior to Jan. 1, 2014	<ul style="list-style-type: none"> Any age with at least 27 years of service or Normal retirement age* with at least 5 years of service 	<ul style="list-style-type: none"> JRP: 8 years of service LRP: 5 years of legislative service or 8 years of service
On or after Jan. 1, 2014	<ul style="list-style-type: none"> Must meet rule of 87 (age + service = 87) and must be at least 57 years of age or Age 65 with at least 5 years of service 	No reduced benefit provisions

Note: JRP = Judicial Retirement Plan; LRP = Legislators' Retirement Plan.

*The normal retirement age is 65, except that it is reduced by 1 year for every 5 years of service and for each year the benefit exceeds 100 percent of final compensation. The normal retirement age cannot be reduced below age 60.

**Reduction set by statute of 5 percent per year for the lesser of the difference in years between either the member's age or normal retirement age or years of service and the number 27.

Source: Judicial Form Retirement System.

Plan Benefits

Each plan is designed to provide three types of benefits: a monthly retirement benefit for life, disability/death benefits, and health insurance benefits after retirement. Benefits vary based on the plan (JRP or LRP) and the date the employee first began participating in the plan. The following pages provide information on each of these benefits.

Monthly Retirement Benefits For Members Participating Prior To January 1, 2014

Benefits for members who began participating in the systems prior to January 1, 2014, are based on the following formula established by statute:

$$\text{Final compensation} \times \text{Benefit factor} \times \text{Years of service credit} = \text{Monthly benefit}$$

Tables 3.4 and 3.5 provide retirement benefit calculations for members under this formula.

Table 3.4
Retirement Benefit Calculation For JRP Members Participating Prior To January 1, 2014

Final Compensation	Benefit Factor	Service Credit
Monthly average of last 60 months preceding retirement	<ul style="list-style-type: none"> • 5.00% for those participating before July 1, 1978 • 4.15% for those who began participating on or after July 1, 1978, but prior to June 30, 1980 • 2.75% for all others 	Service credited as member of state court; qualified purchased or transferred service

Note: JRP = Judicial Retirement Plan.

Table 3.5
Retirement Benefit Calculation For LRP Members Participating Prior To January 1, 2014

Final Compensation	Benefit Factor	Service Credit
Monthly average of highest 3 years of salary	Legislators in office as of July 1, 1982: <ul style="list-style-type: none"> • 5.00% if participation began before July 1, 1978 • 4.15% if participation began on or after July 1, 1978 but prior to June 30, 1980 • 3.50% if participation began on or after July 1, 1980 but prior to June 30, 1982 Legislators electing membership after July 1, 1982: <ul style="list-style-type: none"> • 2.75% 	Service credited as member of General Assembly; qualified purchased or transferred service

Note: LRP = Legislators' Retirement Plan.

Source: Judicial Form Retirement System.

At retirement, a retiree may choose to take an optional payout of the statutory lifetime 50 percent annuity to a qualified surviving spouse. If there is no qualified surviving spouse, dependent children until they reach age 21 and disabled children are eligible for survivor's benefits.

Retirement Benefit Calculation For Members Participating On Or After January 1, 2014

Members who begin participating in the plans on or after January 1, 2014, are provided retirement benefits through a cash balance plan that provides benefits based on an account balance, rather than on a formula. This change was enacted in SB 2 during the 2013 Regular Session.

The cash balance plan is not a defined contribution plan, but rather a defined benefit plan that operates as another benefit tier within the plans. Although it is a type of defined benefit plan, it does have several characteristics of a defined contribution plan with individual member accounts, benefits based on the member's account balance at retirement (member and employer contributions and investment returns), and some variability in benefits due to investment returns. It differs from a defined contribution plan in that a minimum level of investment return is guaranteed on the member accounts, the plans rather than the member manage investments, and members can annuitize their account balance upon retirement (to receive it in the form of a monthly benefit).

In the cash balance plan, members contribute the same amount as employees who began participating prior to January 1, 2014, except that 5 percent of pay they contribute to fund

pension benefits goes into their individual accounts, along with an employer pay credit of 4 percent of their salary. Members receive a guaranteed return of 4 percent annually and 75 percent of the excess returns above 4 percent (the excess returns are calculated on a 5-year smoothed return). JFRS decided to establish separate funds for hybrid cash balance participants, so the investment return credited as of June 30, 2020, was 4 percent. This was the same interest rate credited as of June 30, 2019.

Members in the cash balance plan are vested for employer contributions and investment returns on those employer contributions after 5 years. Upon reaching retirement eligibility, members can take their account balance in a lump sum or have it annuitized into a monthly benefit optional payment currently available through the plan.

Retiree Health Insurance Benefits

JFRS also provides access to group rates and medical insurance for retired members and their spouses and dependents. Coverage for retirees not eligible for Medicare is provided through the Kentucky Employees' Health Plan, the same health plan provided to state and school board employees. Coverage for Medicare-eligible retirees is provided through a plan contracted through JFRS, which then coordinates with Medicare for delivery of health benefits.

As provided by state statute, the systems also subsidize medical coverage for the retiree and, in the case of members who began participating prior to January 1, 2014, for qualified dependents of the retiree. In general, members participating prior to January 1, 2014, receive a percentage of the premium paid upon retirement based on their service credit, while members who begin participating after that date receive a set dollar amount per month for each year of service credit. Tables 3.6 and 3.7 provide details about the benefits for JRP and LRP members based on their participation dates.

Table 3.6
Retiree Health Insurance Premium Payments For JRP Retirees

Participation Date In System	Eligibility Requirements	Percent Or Dollars Of Premium Paid For Retiree And Qualified Dependents Of Retiree		
		Years Of Service At Retirement	% Of Premium Paid For Retiree	% Of Premium Paid For Dependents
Before Jan. 1, 2014	Must be drawing monthly benefit	Less than 4	0%	0%
		4, but less than 10	25	25
		10, but less than 15	50	50
		15, but less than 20	75	75
		20 or more	100	100
On or after Jan. 1, 2014	Must be drawing monthly benefit and must have at least 15 years of service	\$10 per month paid toward the health premium for each year of earned service. Amount is adjusted by 1.5% annually from the date benefits commence.		

Note: JRP = Judicial Retirement Plan.

		16, but less than 17	80	80
		17, but less than 18	85	85
		18, but less than 19	90	90
		19, but less than 20	95	95
		20 or more	100	100
On or after Jan. 1, 2014	Must be drawing monthly benefit and must have at least 15 years of service	\$10 per month paid toward the health premium for each year of earned service. Amount is adjusted by 1.5% annually from the date benefits commence.		

Note: LRP = Legislators' Retirement Plan.

Source: Judicial Form Retirement System.

Disability And Death Benefits

Like most defined benefit plans, the plans provide benefits for those members who become disabled or to the qualified survivors of members who die in office, including in-the-line-of-duty disability and death benefits. After retirement, the statutorily prescribed survivor's benefits may vary based on the payment option selected at the commencement of benefits.

Cost Of Living Adjustments On Monthly Retirement Benefits

After the passage of SB 2 in the 2013 Regular Session of the General Assembly, members of the plans will no longer receive automatic annual increases of 1.5 percent on their monthly retirement benefits. Language in SB 2 did provide that a 1.5 percent cost of living adjustment could be granted

- if an individual plan is 100 percent funded and subsequent legislation authorizes the use of surplus funds to provide the 1.5 percent COLA, or
- if the General Assembly appropriates or directs payment of funds to prefund the COLA in the year it is provided.

Service Purchases And Transfers

Members participating in the plans can choose to transfer service for other public employment or purchase service credit as established by law, such as military service, federal service, and nonqualified service, provided certain requirements established by state statute are met. However, legislative changes in 2013 eliminated service purchases for new participants entering the plans on or after January 1, 2014, with the exception of recontributions of refunds.

Reciprocity

Members who have service in more than one retirement plan administered by the Commonwealth of Kentucky can combine service in the plans to determine eligibility for retirement. LRP members who began contributing on or after June 20, 2005, but prior to January 1, 2014, may also combine salary in other state retirement plans for purposes of determining final compensation (years of highest salary). Each system will pay a benefit based on the amount of service in that system or plan.

Taxation Of Benefits

Monthly benefits from all systems are subject to federal income tax. If a member made contributions with after-tax dollars (usually service purchases), then a portion of the monthly benefit at retirement will not be subject to federal income tax.

All benefits attributable to service earned on or before December 31, 1997, are exempt from Kentucky income tax. The portion of the member's benefits earned on and after January 1, 1998, is subject to Kentucky income tax. However, an annual pension exclusion of \$31,110 applies to this portion and to other retirement income sources.

2020 Legislative Changes

No measures that directly affected the Judicial Form Retirement System were passed during the 2020 Regular Session.

Chapter 4

Funding And Investments

System And Plan Funding

Funding for benefits and expenses for each of the state-administered retirement systems and plans is provided through three sources: employee contributions, employer contributions, and return on investment. Employee contributions are set by state statute and do not vary. Employer contribution rates vary based on the results of actuarial valuations completed by the systems. The investment return evaluates the performance of a plan's investment portfolio relative to the investments' cost.

Employee and employer contributions include funding for retirement benefits, which is managed and invested in separate pension funds for each of the systems and plans, and funding for retiree health benefits, which is managed and often invested in funds separate from the pension funds for each of the systems and plans, except for JRP and LRP. However, JRP and LRP each have separate funds for management and investment purposes for members in the traditional defined benefit plan and for members in the hybrid cash balance plan who began participating on or after January 1, 2014. TRS also manages a separate life insurance fund, which receives a minimal employer contribution.

Employee Contribution Rates

The employee contribution rates are set by state statute for each of the systems and plans. Legislative changes in 2008 increased the employee contribution rate for future members of all state-administered retirement systems, and legislative changes in 2010 increased the employee contribution rate for current and future members of TRS. Table 4.1 lists the employee contribution rate, as a percentage of the employee's pay, for each system or plan.

Table 4.1
Employee Contribution Rates By State-Administered Retirement System/Plan

System/Plan	Participation Date/Structure	Employee Contribution Rate (As Percentage Of Pay)		
		Pension	Health	Total
KERS/CERS	• Prior to Sept. 1, 2008	5%	0%	5%
nonhazardous	• On or after Sept. 1, 2008	5	1	6
KERS/CERS	• Prior to Sept. 1, 2008	8	0	8
hazardous; SPRS	• On or after Sept. 1, 2008	8	1	9
TRS	• Nonuniversity employees	9.105	3.750	12.855
	• University employees*	5.410	2.775	8.185
JRP/LRP	• Prior to Sept. 1, 2008	5	0	5
	• On or after Sept. 1, 2008, prior to Jan. 1, 2014	6	0	6
	• On or after Jan. 1, 2014	5	1	6

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System; TRS = Teachers' Retirement System; JRP = Judicial Retirement Plan; LRP = Legislators' Retirement Plan.

*University employers have elected to pay 2.215 percent of the employee contribution rate as authorized by Kentucky Revised Statute 161.565. The amount listed is the adjusted employee contribution rate.

Actuarial Valuation Process

All systems conduct an annual or semiannual actuarial valuation of the systems they administer. The purpose of the valuation, which is completed by an actuary hired by a system, is to determine three main items:

- **The amount of benefits (liabilities) to be paid out in the future.** To determine the employer contribution rates and to evaluate the financial health of each system or plan, the actuary must first project the amount of benefits, or system liabilities, to be paid out in the future. These benefits are prescribed by law and regulation and, in some cases, by the board of trustees. To calculate the amount of benefits that will be paid out in the future, the actuary must make assumptions about factors that affect the system's or plan's money (for example, the rate of return on investments, salary growth of employees, retiree medical inflation rates) and its people (for example, when people will retire, how long they will live in retirement). Key actuarial assumptions include investment return, mortality rates, future medical inflation rates, and payroll growth. HB 238, passed in 2016, requires all state-administered retirement systems to perform, once every 5 years, an actuarial experience study to review the funding methods and assumptions used in the actuarial valuation.
- **The financial health of the systems/plans.** In the valuation, the actuary reports several statistics useful in evaluating the financial health of the systems or plans as of the valuation date. The two most common actuarial statistics are the unfunded liability and the funding level, which compares the actuarially accrued liability (liability for benefits earned to date) against system assets. The unfunded liability is the dollar amount of the actuarially accrued liabilities that are not covered by system or plan assets. The funding level is the percentage of

the actuarially accrued liability covered by system or plan assets. In calculating the unfunded liabilities and funding level as of the valuation date, the actuary uses a smoothed market value known as the actuarial value of assets that smooths actual investment gains or losses over a 5-year period. Both of these statistics are affected by four main factors: the level of benefits payable in the future, the assumptions used by the system's actuary, the system's actual experience against those assumptions, and the level of funding made by the employer.

$$\begin{array}{l} \text{Actuarial value of assets} \\ - \text{actuarially accrued liability} \\ = \text{unfunded liabilities} \end{array}$$

$$\begin{array}{l} \text{Actuarial value of assets} \\ \div \text{actuarially accrued liability} \\ = \text{funding level} \end{array}$$

- **The level of employer contributions:** The employer contribution for each of the systems and plans includes two contributions: one to fund pension benefits and one to fund retiree health benefits. TRS also has a contribution to fund life insurance benefits. Each of these individual contributions comprises two components: a payment for normal cost (the estimated cost of the upcoming year of service for active employees/members) and a payment to finance the unfunded liability over a specific time period or using a specific method. Employer contributions vary based on the level of unfunded liabilities and financial health of the individual system or plan. As unfunded liabilities increase (or decrease), there is an increase (or decrease) in the level of employer contribution rates needed to adequately fund the system or plan. Employer rates can also vary based on funding policies established by statute, by the biennial state budget, and in some cases by the board of trustees of the systems or plans. Actuarial valuation results are applicable to employer contributions payable in the budgeting period that follows the valuation.

Amortization Periods And Methods

The various systems and plans use different amortization periods and methods for paying off unfunded liabilities in their actuarial valuations.

As required by statute, KRS amortizes unfunded liabilities over a 30-year closed period using the level percentage of payroll method and the 2019 valuation as the start of the 30-year period. The level percentage of payroll method sets amortization payments as a set percentage of projected payroll over the 30-year period, with payroll assumed to grow at a set rate each year. For the KRS pension and health funds, a payroll growth assumption of 2.0 percent (CERS) or 0.0 percent (KERS and SPRS) is used. The amortization period was recently reset to a new 30-year period by SB 249, enacted during the 2020 Regular Session. SB 249 also provided that any new source of unfunded liability occurring after the 2019 valuation for the pension fund be amortized over a separate 20-year closed period.

During the 2017 fiscal year, the KRS board voted to reduce the payroll growth assumption for each underlying plan. For the KERS (both hazardous and nonhazardous) and SPRS plans, the board lowered the assumption for the pension and retiree health funds from 4.0 percent to 0.0 percent. The pension and retiree health fund assumptions for both CERS (hazardous and nonhazardous) plans were reduced from 4.0 percent to 2.0 percent.

As provided by board policy, TRS amortizes pension unfunded liabilities accrued as of the 2014 actuarial valuation over a 30-year closed period using the level percentage of payroll method and the 2014 valuation as the start of the 30-year period. Any new source of unfunded liability occurring after the 2014 valuation for the pension fund is amortized over a separate 20-year closed period. However, the policy requires the pension fund to be 100 percent funded in 30 years. Unfunded liabilities of the TRS retiree health and life insurance funds are amortized over closed 23-year and 27-year periods, respectively. Prior to the FY 2017 valuation, both funds were amortized over open, 30-year amortization periods. For all TRS funds, a 3.5 percent payroll growth assumption is used to project payroll. In the 2016 valuation, the TRS board lowered the payroll growth assumption from 4.0 percent to 3.5 percent.

JRP and LRP amortize unfunded liabilities by a formula set in state statute. The formula provides an amortization payment for these plans equal to the investment return assumption plus 1 percent (total of 8 percent) of the dollar value of the plan's unfunded liability.

Investment Return Assumptions

The investment return assumption, which is also the rate used to discount future liabilities in the actuarial valuation, is another key assumption in the actuarial valuation. Table 4.2 shows, for each system or plan, the actuarial assumed rate of return used in the 2020 actuarial valuation.

Table 4.2
Actuarial Assumed Rate of Return
By State-Administered Retirement System/Plan

System/Plan	Pension	Health
KERS nonhazardous	5.25%	6.25%
KERS hazardous	6.25	6.25
CERS nonhazardous	6.25	6.25
CERS hazardous	6.25	6.25
SPRS	5.25	6.25
TRS	7.50	8.00
JFRS (JRP and LRP)	6.50	6.50

Note: KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System; TRS = Teachers' Retirement System; JFRS = Judicial Form Retirement System; JRP = Judicial Retirement Plan; LRP = Legislators' Retirement Plan.

Source: KRS, TRS, LRP, and JRP actuarial valuations.

The KRS and JFRS boards voted to reduce the return assumptions used in pension and retiree health fund valuations during 2017. For pension, the KERS nonhazardous and SPRS assumption was reduced to 5.25 percent from 6.75 percent, while KERS hazardous and both CERS plans were reduced to 6.25 percent from 7.5 percent. The JFRS board lowered the return assumption for LRP and JRP to 6.5 percent from 7.0 percent. For retiree health funds, all five KRS plans were reduced to 6.25 percent from 7.0 percent, while JRP and LRP were reduced to 6.5 percent from 7.0 percent. The TRS board has not approved any changes to the system's assumed rate of return since 2010, when the retiree health fund assumption increased.

Financial Health Of The Systems

Tables 4.3 to 4.6 provide a 10-year summary of funding levels and unfunded liabilities for the pension and retiree health funds for each system, as determined from annual actuarial valuations.

Funding levels for each of the system or plan pension funds have generally fallen over the 10-year period, and the total unfunded liabilities for the combined pension funds have grown from \$23.6 billion to \$40.5 billion over the period. More recently, some of the pension plans have experienced some level of stabilization, largely due to additional funding or better investment experience. Over the same period, funding levels for each of the retiree health funds have generally improved and unfunded liabilities for the combined retiree health funds have fallen from \$10 billion to \$3.8 billion.

Note: KERS = Kentucky Employees Retirement System; NH = nonhazardous duty; H = hazardous duty; CERS = County Employees Retirement System; SPRS = State Police Retirement System; TRS = Teachers' Retirement System; JRP = Judicial Retirement Plan; LRP = Legislators' Retirement Plan. Values for JRP and LRP do not include hybrid cash balance plan participants, which are reported in a separate actuarial valuation.

Source: KRS, TRS, and LRP, and JRP actuarial valuations.

GASB 67 Reporting Requirements

In 2012, the Governmental Accounting Standards Board (GASB) issued two new statements that change the way public retirement systems (such as KRS, TRS, and JFRS) and its participating employers report pension information. One of these statements, GASB 67, effectively divorced pension plan reporting standards from funding standards. The result is that two values may often be discussed relative to the health of a system's pension fund—one for funding purposes and one for GASB 67 reporting purposes.

For the pension funds administered by KRS and TRS, the values used for funding purposes and for reporting purposes under GASB 67 are similar.

Regarding the pension funds administered by JFRS, the values used for reporting purposes under GASB 67 have historically been higher than values used for funding purposes. In the 2020 GASB reports, the LRP pension fund is 106.3 percent funded, compared to 107 percent in the 2019 GASB reports. In the same GASB reports, the JRP values are 91.6 percent and 90.7 percent for the 2020 and 2019 reports, respectively.

Experience Studies

Statute requires all state-administered retirement systems to complete an actuarial experience study at least once every 5 years. The purpose of the experience study is to evaluate the current assumptions and funding methods (what was supposed to happen) against the experience of the systems (what actually happened) and to determine whether changes to assumptions and methods should be adopted.

The KRS board of trustees conducted its last experience study in 2019 for the period ending June 30, 2018. Changes primarily focused on demographic assumptions, the most notable of which was adjusting the mortality assumptions to reflect longer life expectancy for members for each system. The assumption changes adopted by the KRS board of trustees were made effective for the 2019 actuarial valuation and impact the recommended employer contribution rates requested for FY 2021 and after.

In 2020, the TRS board of trustees began its experience study for the period ending June 30, 2020, and anticipates its conclusion and presentation to the board by midyear of 2021. The LRP and JRP will also conduct an experience study in 2021.

KERS, CERS, And SPRS Employer Rates

Employer contribution rates paid by participating KRS agencies differ by retirement system and fluctuate based on the financial health of the individual system as determined by the actuarial valuation and the funding policies established by statute and the board of trustees.

For KERS and SPRS, employer contribution rates established by the KRS board vary every 2 years to coincide with the state's biennial budgeting process.^a In 2020, the General Assembly enacted a 1-year budget providing FY 2021 funding at the employer contribution rate established by the KRS board, except that it maintained a rate freeze for a group of 118 quasi-governmental KERS nonhazardous employers at the 2018 level.^b

Tables 4.7 to 4.9 show the KERS and SPRS employer contribution rates established by the KRS board of trustees and the amount provided in the biennial state budget from FY 2011 to FY 2022.

^a SB 2 provided that the Kentucky Retirement Systems Board of Trustees could amend the KERS and SPRS employer contribution rates only every 2 years to coincide with the biennial state budget. This change was effective with KERS and SPRS employer contribution rates payable on or after July 1, 2014.

^b HB 352, passed during the 2020 Regular Session, maintained the FY 2019 and FY 2020 contribution rate freeze at 49.47 percent for 118 entities, including regional mental health agencies, health departments, universities, and advocacy agencies participating in the KERS nonhazardous plan.

Table 4.7
KERS Nonhazardous Employer Contribution Rates As Percentage Of Payroll
FY 2011 To FY 2022

Fiscal Year Ended	Rate Established By KRS Board			Total Budgeted Rate
	Pension	Retiree Health	Total

* HB 352, passed during the 2020 Regular Session, maintained the FY 2019 and FY 2020 contribution rate freeze at 49.47 percent for 118 entities, including regional mental health agencies, health departments, universities, and advocacy agencies participating in KERS nonhazardous plan.

Source: Kentucky Retirement Systems.

For FY 2020, the dollar value of the employer contributions for KERS nonhazardous totaled \$1.124 billion. In total, employer contributions decreased \$94 million from the FY 2019 total of \$1.218 million.

Table 4.8

Source: Kentucky Retirement Systems.

For FY 2020, the dollar value of the employer contributions for KERS hazardous totaled \$64.9 million, an increase of \$4.5 million from the FY 2019 total of \$60.4 million, driven primary by the higher employer contribution rate from the prior fiscal year.

Table 4.9
SPRS Employer Contribution Rates As Percentage Of Payroll
FY 2011 To FY 2022

Fiscal Year Ended	Rate Established By KRS Board			Total Budgeted Rate
	Pension	Retiree Health	Total	
2011	35.74%	49.89%	85.63%	45.54%
2012	39.80	54.83	94.63	52.13
2013	47.48	55.93	103.41	63.67

2021	123.79	19.69	143.48	143.48
2022	127.99	18.07	146.06	146.06

Note: SPRS = State Police Retirement System; KRS = Kentucky Retirement Systems.

Source: Kentucky Retirement Systems.

For FY 2020, the dollar value of the employer contributions for SPRS totaled \$72.6 million, which included general fund appropriations of \$1.1 million to be applied to the unfunded liability. In total, employer contributions increased \$3.2 million from the FY 2019 total of \$69.4 million.

As shown in Tables 4.10 and 4.11, the CERS employer contribution rates established by the KRS board of trustees vary annually based on the results of the most recently completed actuarial valuation. For FY 2020, employers saw an increase in rates as a result of the board's decision to lower payroll growth and investment return assumptions in the 2017 valuation.

During the 2018 Regular Session, HB 362 established a schedule to phase in to the full actuarially determined rate beginning in FY 2019. The phase-in process limits the increase in employer contribution rates to no more than 12 percent annually for the next 10 years. During the 2020 Regular Session, SB 249 paused the phase-in process at the FY 2020 levels for a 1-year period.

Table 4.10
CERS Nonhazardous Employer Contribution Rates As Percentage Of Payroll
FY 2011 To FY 2022

Fiscal Year Ended	Pension	Retiree Health	Total	Employer Rate Paid
2011	10.03%	6.90%	16.93%	16.93%
2012	11.70	7.26	18.96	18.96

2022	43.23	8.73	51.96	44.33*

Note: CERS = County Employees Retirement System.

* HB 362, passed in 2018, limits the annual increase in contribution rates to 12 percent in projected dollars.

** SB 249, passed in 2020, paused the phase-in process at the FY 2020 level for 1 year.

Source: Kentucky Retirement Systems.

For FY 2020, the dollar value of the employer contributions to CERS hazardous totaled \$226.3 million, an increase of \$25.5 million from the FY 2019 total of \$200.8 million.

TRS Employer Rates

TRS employer contribution rates differ for nonuniversity and university employers, as shown in Table 4.12. The TRS employer rates for FY 2019 and FY 2020 include the following:

- **A fixed statutory rate** payable by participating employers. Prior to the passage of HB 540 in 2010, nonuniversity employers paid a fixed statutory rate of 13.105 percent, which was and is financed primarily by state appropriations. Due to the passage of HB 540, nonuniversity employers must also contribute up to 3.0 percent of pay toward retiree health funding, resulting in a total fixed statutory rate of 16.105 percent of pay.^c For university employers, the equivalent statutory rate is 13.650 percent of pay.
- **A state special contribution** for both nonuniversity and university employers that consists of state appropriations to TRS to pay amortized payments for specific benefits such as ad hoc COLAs awarded in prior years, minimum benefit provisions, and the costs of additional pension benefits for accumulated sick leave payments made by local school districts for retiring employees. The amount of this contribution changes annually as additional sick leave costs are added and as amortized payments for prior ad hoc COLAs and minimum benefit provisions are paid off. As a percentage of payroll, the values for FY 2019 and FY 2020 equal 2.83 percent and 3.0 percent of pay, respectively.
- **A required increase** in the employer contribution rate that TRS has requested be paid by state appropriations for all nonuniversity and university employers equal to 14.27 percent of pay for the FY 2021 budget, to help fund the pension fund on an actuarially sound basis. TRS has been requesting this additional funding since FY 2007. Table 4.13 provides a breakdown of this required increase requested along with the value of any appropriations.

In addition to these contributions, the state is also required, under HB 540, to pay the cost of health insurance coverage of members who retire on or after July 1, 2010, who are not eligible for Medicare. For FY 2020, total employer contributions—which included the statutory rate, state special, general fund appropriation, and health cost payments—totaled \$1,320.7 million, an increase of \$12.8 million from the FY 2019 total of \$1,307.9 million.

Table 4.12
TRS Employer Contribution Rates As Percentage Of Payroll
FY 2021 And FY 2022

Item	Employer Rates			
	Nonuniversity		University	
	FY 2021	FY 2022	FY 2021	FY 2022
Statutory rate	16.105%	16.105%	13.650%	13.650%
State special	2.890	3.050	2.890	3.050
Required increase	14.270	14.820	14.270	14.820
Total*	46.120%	46.830%	41.210%	41.920%

Note: TRS = Teachers' Retirement System.

*Total includes the statutory Employee Contribution Rate (12.855% for nonuniversity, 10.400% for university).

Source: TRS 2019-2020 actuarial valuations.

^c Under HB 540, nonuniversity employers phased into a 3.0 percent employer contribution rate over a 6-year period to help fund retiree health benefits, and university employers phased into a 2.775 percent employer contribution rate over a 6-year period to help fund retiree health benefits.

Table 4.13
TRS Requests For Required Increase In Employer Contribution Rates
FY 2007 To FY 2021

Fiscal Year Ended	% Of Payroll	Dollar Value Requested	Dollar Value Appropriated
2007	0.11%	\$3,174,600	\$3,174,600
2008	1.32	38,965,900	38,965,900
2009	1.88	60,499,800	—

Note: TRS = Teachers' Retirement System; — = data not provided.

Source: TRS actuarial valuation, biennial state budget.

JRP And LRP Employer Rates

Employer contribution rates, which are paid by state appropriations to JRP and LRP, differ based on the financial health of each individual plan as determined by the actuarial valuation and the funding policies established by statute and by the board of trustees.

For JRP and LRP, employer contribution rates established by the JFRS board of trustees vary every 2 years to coincide with the state's biennial budgeting process. Table 4.14 shows the JRP and LRP employer contribution rates, as a percentage of payroll, established by the JFRS board of trustees and the amount provided in the biennial state budget from FY 2010 to FY 2020. For the current budget biennium, no appropriations were included for employer contributions of the LRP plans.

For FY 2020, the dollar value of the employer contributions paid to JRP totaled \$9.6 million, which represented a negligible increase from the FY 2019 total. For LRP, the dollar value of the employer contributions paid in FY 2020 totaled \$0.3 million, which represented an appropriation to cover administrative costs only. In total, employer contributions remained nearly flat from FY 2019.

Table 4.14
JRP And LRP Employer Contribution Rates As Percentage Of Payroll
FY 2011 To FY 2021

Fiscal Year Ended	JRP Employer Rates		LRP Employer Rates	
	Rate Established By Board	Budgeted Rate	Rate Established By Board	Budgeted Rate
2011	36.80%	16.19%	43.50%	19.14%
2012	36.80	17.66	43.50	20.88
2013	48.57	25.74	61.91	32.81
2014	48.57	27.68	61.91	35.29

2017	41.57	41.57	49.23	49.23
2018	41.23	41.23	49.23	49.23
2019	28.83	28.83	24.67	0.00
2020	28.83	28.83	24.67	0.00
2021	20.73	20.73	8.39	0.00

Note: Employer rates beginning in 2017 represent a total, combined rate for both the defined benefit and cash balance plans. JRP = Judicial Retirement Plan; LRP = Legislators' Retirement Plan.

Source: Judicial Form Retirement System.

Sensitivity Analysis

Under the provisions of HB 238, which was passed during the 2016 Regular Session, all state-administered pension plans are required to incorporate sensitivity analysis into actuarial valuations to show the impact of changing key actuarial assumptions such as the assumed rate of investment return and the payroll growth rate.

KRS and TRS are required by statute to conduct an actuarial valuation annually, and JFRS is required to complete a valuation every other fiscal year. For 2020, the KRS and TRS valuations included analysis on how sensitive funding was to investment return, rate of inflation, and payroll growth assumptions.

Relative to the investment return assumption, for the KERS nonhazardous pension fund, the analysis showed that reducing the assumed return from 5.25 percent to 4.25 percent would reduce the funding level from 14.2 percent to 12.6 percent, increase unfunded liabilities by an additional \$2 billion, and require additional employer contributions of 8.0 percent of pay. For the TRS pension fund, reducing the assumed return (discount rate) from 7.5 percent to 6.5 percent would decrease the funding level to 52.5 percent from 58.4 percent, increase unfunded liabilities by an additional \$4.06 billion, and require additional employer contributions of 8.63 percent of pay. The JRP and LRP sensitivity analyses are not due for this fiscal year.

Relative to the payroll growth (wage inflation) assumption, changes do not immediately impact the funding level or unfunded liability of a plan, but they will have an impact on required employer contributions. For the KERS nonhazardous pension fund, the analysis showed that reducing the payroll growth assumption from 0 percent to negative 1.0 percent would require an additional employer contribution of 8.0 percent of pay. For the TRS pension fund, the analysis showed that reducing the payroll growth assumption from 3.5 percent to 2 percent would require

an additional employer contribution of 4.21 percent of pay; reducing it from 3.5 percent to 0 percent would require an additional employer contribution of 10.5 percent of pay.

2020 Audited Financial Statements

For the fiscal year ended June 30, 2020, the combined net plan assets of all state-administered pension funds grew by \$276 million to a combined total market value of \$33.9 billion. The KERS nonhazardous and TRS plans saw assets grow, while CERS nonhazardous saw a slight decline. KERS nonhazardous continued to cash flow from employer contributions, complimented by a modest investment return. TRS assets grew as a result of positive investment returns, partially offset by negative cash flow. The CERS nonhazardous and hazardous funds decreased as a result of asset declines and the phase-in of the employer contribution rate. The CERS employer rate is subject to an increase of no more than 12 percent annually as a result of HB 362 passed during the 2018 Regular Session. The LRP's pension fund assets remained flat, having not received a general fund appropriation for the FY 2020. Table 4.15 provides pension net plan assets at the beginning of year and end of year for the fiscal year ended June 30, 2020, and the additions and deductions that resulted in the net plan asset change over the year.

Table 4.15
Pension Fund Net Plan Assets And Changes In Net Plan Assets (In Millions)
As Of June 30, 2020

	KERS NH	KERS H	CERS NH	CERS H	SPRS	TRS	LRP	JRP

Total deductions	\$1,024	\$76	\$833	\$282	\$63	\$2,207	\$5	\$24
Net plan assets (EOY)	\$2,363	\$699	\$7,112	\$2,397	\$295	\$20,718	\$77	\$341

Note: The health insurance contribution is the 1 percent of pay contribution made by employees who began participating in the KRS systems on or after August 1, 2008, as provided in 2008 HB 1. The employee contribution, while required to be part of the pension trust assets, is used to fund retiree health benefits. KERS, CERS, and SPRS employer contributions include pension spiking charges. KERS = Kentucky Employees Retirement System; NH = nonhazardous duty; H = hazardous duty; CERS = County Employees Retirement System; SPRS = State Police Retirement System; TRS = Teachers' Retirement System; LRP = Legislators' Retirement Plan; JRP = Judicial Retirement Plan; BOY = beginning of year; cont. = contributions; — = not reported; EOY = end of year.

Source: June 30, 2020, KRS Annual Report, TRS Annual Report, and JFRS Actuarial Valuation.

For the fiscal year ended June 30, 2020, the combined net plan assets of all state-administered retiree health funds increased by \$252 million to \$7.29 billion. Asset growth occurred in every state-administered plan, largely driven by positive cash flow and positive investment gains.

Table 4.16 provides, for each system and plan, retiree health net plan assets at the beginning of year and end of year for the fiscal year ended June 30, 2020, and the additions and deductions that resulted in the net plan asset change over the year.

Table 4.16
Retiree Health Fund Net Plan Assets And Changes In Net Plan Assets (In Millions)
As Of June 30, 2020

	KERS NH	KERS H	CERS NH	CERS H	SPRS	TRS	LRP	JRP

2020 Investments And Investment Performance

As outlined in Kentucky Revised Statute 7A.250, the Public Pension Oversight Board conducted semiannual reviews of the state-administered retirement systems investment program. The reviews analyzed asset allocation, performance and volatility, policies, fees and expenses, and securities litigation. In addition to this review, members also heard quarterly investment updates from each retirement system.

State-Administered Retirement Systems Funds

KRS manages two separate pension and retiree health funds for each of the five separate systems it administers. Assets are managed both internally by KRS investment staff and externally by investment managers. The KRS board of directors has authorized and directed a nine-member

investment committee required by statute to manage the investment portfolios in accordance with approved policies.

TRS manages separate pension and retiree health funds for the system it administers. Assets are managed both internally by investment staff and externally by investment managers. The TRS board of trustees has authorized and directed a five-member investment committee to manage the investment portfolios in accordance with approved policies and statutes. Two additional nonvoting members, both with investment experience, added by the TRS board also serve on the committee.

JFRS is responsible for managing separate funds for the JRP and LRP, with each plan having a fund for the traditional defined benefit plan and the hybrid cash balance plan. Assets are managed by a single external investment manager. Statute provides for a five-member investment committee for each plan to manage and oversee the investment portfolios in accordance with approved policies and statutes.

Asset Allocation

Assets are diversified across various assets classes as determined by the investment committees and boards of trustees of each fund. For KRS and TRS, target asset allocations are driven by asset liability studies, which are conducted typically every 5 years by a third-party consultant. Asset classes currently used by all systems include traditional public markets, such as equities and fixed income, while KRS and TRS also invest in alternative assets, which include absolute return, real return, and private equity.

Table 4.17 shows actual asset allocations for all pension funds as of June 30, 2020, along with an LRC staff-calculated peer group.

Table 4.17
Pension Fund Asset Allocation
June 30, 2020

	State-Administered Plans								LRC Peer Group
	KERS NH	KERS H	CERS NH	CERS H	SPRS	TRS	LRP	JRP	
Public markets	76.6%	77.5%	76.7%	76.7%	79.3%	84.6%	99.9%	99.9%	71.5%
• Equity	33.7	39.2	39.1	39.1	35.2	61.9	77.0	76.1	47.8
• Fixed	42.9	38.3	37.6	37.6	44.2	22.7	22.9	23.8	23.7

Source: LRC Annual Investment Review, October 2019.

As shown in the table, the KRS funds have a lower allocation to public equity and more fixed income assets as compared to peers, while the TRS and JFRS funds have above average exposure to public equity assets. Each of the portfolio's asset allocation is driven by period asset allocations and the actuarial assumed rate of return each is targeting.

According to Cliffwater LLC (May 2020), *An Examination Of State Pension Performance: 2000 To 2019 Report*, a state plan's average exposure to public equity was 46 percent, fixed income assets was 21 percent, and alternative assets accounted for 32 percent of assets. In addition, a Legislative Research Commission staff review of public pension plan asset allocations, which included 39 of 69 state employee or teacher plans, revealed similar results.

Investment Performance

Table 4.18 shows pension and retiree health fund performance for each retirement system over the trailing 1-, 3-, 5-, and 10-year periods ended June 30, 2020. Each of the plans provided positive returns for the 2020 fiscal year, with returns ranging from 0.7 percent to 5.9 percent, and most plans, except for the JFRS plans, exceeded assumed rates of returns during the fiscal year with less than favorable market conditions.

In general, investment returns were low and, in regard to KRS, each of the underlying pension plans failed to earn their actuarial assumed rates of return. However, all plans exceeded their respective performance benchmarks for the fiscal year. Longer term, the pension funds have generally performed very similarly to their benchmarks, while providing returns that have met or exceeded their assumed rate of return. On the retiree health side, each of the plans has returned strong, positive results but has struggled to keep pace with benchmarks over the longer time frames.

The TRS pension fund exceeded its performance benchmark during the current fiscal year, and the portfolio has performed in line or above across all other trailing periods. The retiree health fund, which was established by HB 540 in 2010 and transitioned to established strategic targets during FY 2015, has provided positive returns since inception.

The JRP and LRP plans, which include both retiree health and pension funds together, fell short of their respective performance benchmarks for the current fiscal year. However, over the longer periods, both funds have performed well and have exceeded both the assumption and benchmark.

Table 4.18

Benchmark	7.4	8.9	8.7	11.6	—	—	—	—

Note: The TRS medical trust was established by HB 540 in April 2010. Because of its size and cash flow position, FY 2015 was the first year for which strategic targets and ranges were established for the fund. FY 2016 was the first year for which a policy benchmark was measured for the fund. KERS = Kentucky Employees Retirement System; CERS = County Employees Retirement System; SPRS = State Police Retirement System; TRS = Teachers' Retirement System; LRP = Legislators' Retirement Plan; JRP = Judicial Retirement Plan.

*The 1- and 3-year returns are net of fee; longer-term returns are gross.

Source: Kentucky Retirement Systems, Teachers' Retirement System, and Judicial Form Retirement System.

In addition to evaluating each system relative to stated policy benchmarks, the Public Pension Oversight Board also reviewed investment results against two other public fund peer groups: Wilshire TUCS and BNY Mellon. Table 4.19 includes median results from the two publicly available peer groups, as well as an LRC staff-generated peer group consisting of only US state employee and teacher plans.

Table 4.19
Peer Group Median Investment Returns
June 30, 2020

	1 Year	3 Year	5 Year	10 Year

Investment Expense

Table 4.20 provides pension and retiree health care fund investment expense for the fiscal year ended June 30, 2020.

Pension fund expenses are reported and include management fees by asset class, as well as other incentive fees. For KRS, total management fees for the pension fund equaled \$50.7 million, or 39.9 basis points, while the system also reported additional alternative or incentive-based expenses of \$2.4 million. When combined, KRS reported expenses of \$53.1 million, or 41.7 basis points. TRS reported total management fees of \$61.0 million for the pension fund, or 30.2 basis points. Additionally, TRS reported a negative \$1.5 million in general partner profit sharing, or carried interest, for the retirement fund over FY 2020. Lastly, total fees for JFRS during the fiscal year were \$560,193 or 8.2 basis points. All JFRS pension and retiree health assets are managed together by a single investment manager, so separate fees for pension and retiree health are not recorded.

Table 4.20
Investment Expense By System (In Millions)
June 30, 2020

	KRS			TRS			JFRS

Chapter 5

2020 Public Pension Oversight Board Meetings

Testimony Before The Board

During 2020, the Public Pension Oversight Board met seven times. Board members received testimony regarding benefits, funding, and investments at multiple meetings. Benefits, funding, and investment summaries and issues related to these subjects are included in Chapters 1 to 4 of this report. The board also heard testimony regarding changes to the Kentucky Retirement System's governance structure to take effect in 2021, amortization methods and policies to finance the unfunded liabilities of retirement systems in Kentucky and other states, the pension strategy for community mental health centers, and health care cost reciprocity between state-administered retirement systems. A summary of these additional issues and testimony appears below.

County Employees Retirement System Separation Update

The Public Pension Oversight Board heard testimony during its July meeting from KRS staff and stakeholder groups regarding the implementation of HB 484. Passed during the 2020 Regular Session with an effective date of April 1, 2021, HB 484 changes the governance structure of the KRS from one board to three governance boards:

- a nine-member board to govern KRS and SPRS,
- a separate nine-member board to govern CERS, and
- an eight-member board to be named the Kentucky Public Pension Authority to administer the day-to-day operations for all the underlying plans.

As part of HB 484, the General Assembly also declared its intent to enact additional legislation during the 2021 Regular Session to create separate statutory benefit structures for KERS and CERS, while retaining shared statutes that relate to administrative provisions that will be the responsibility of KPPA.

During 2020, KRS staff established a task force to implement the items necessary to address before April 1, 2021. The taskforce identified several key issues that require legislation during the 2021 Regular Session. KRS staff recommended the following:

- Legislation should be enacted allowing board appointments, convening the boards, and permitting board decisions all prior to April 1, 2021, but with the decisions having a delayed effective date to April 1, 2021.
- Legislation should be enacted exempting the hiring of a chief executive officer by KPPA and KRS from the provisions of KRS Chapter 45A, the Model Procurement Act. As enacted, HB 484 provides an exemption for the hiring of a CEO for CERS.
- Legislation should be enacted to address procedure when there is a tie vote on the eight-member KPPA.

Administratively, KRS staff is performing the tasks necessary to establish the new boards and a new state agency, including changes impacting the new entity's finances, legal matters, publications and print media, communications, and benefit processing.

Stakeholder groups represented by the Kentucky League of Cities (KLC) provided testimony supporting legislation as needed to expedite the implementation of the new governance structure. Regarding the Model Procurement Act, KLC recommended that legislation be amended to require CERS to follow KRS Chapter 45A and the procurement process to hire the CEO, so that the selection of all board positions is transparent to the public. KLC also recommended that any new legislation retain an eight-member board for KPPA and the requirement that the CEO of CERS be an attorney.

UAL Financing Methods

The Public Pension Oversight Board adopted as an administrative recommendation for 2020 to have staff research and evaluate the amortization methods and policies other state systems use to pay off unfunded liabilities and the impact of layering or stacking of future actuarial gains and losses. At the July 2020 meeting, LRC staff presented its review of plans within and outside of Kentucky.

Staff provided a brief overview of the actuarial valuation process, which calculates a plan's funding level and the unfunded accrued liability (UAL). The actuarial valuation process incorporates various key inputs refined over time with periodic studies and audits. These inputs include actuarial assumptions, benefits and funding provisions, financial experience, and demographic and data experience. The actuarial valuation process yields information on a plan's status (funding level and UAL) and the employer contribution rate. A plan's actuarially required contribution is then composed of two underlying building blocks: normal cost (which represents the cost for the annual benefit accrual) and an annual amortized UAL payment (which is the plan's portion of a larger UAL debt).

A retirement plan must develop a structure to finance or pay down its UAL. These are four key components of a financing policy:

- The amortization period in length (15 years, 20 years, 30 years)
- The amortization period by type—is it closed or open, and is the period fixed, variable, or rolling?
- The amortization basis—is it single or separate amortization bases, and by year, source, or both?
- The amortization method—level percent of payroll or level dollar

Historically, most retirement plans used a 30-year amortization period, but recent evidence is that plans are moving to a 20-year period for at least some of their UAL. The Government Finance Officers Association now recommends a shorter period. Similarly, most plans, including KRS (until 2007) and TRS (until 2013) had chosen open periods, which prolongs the payback period, sometimes indefinitely, and is more likely to lead to negative amortization. According to national and staff research, the majority of larger state plans are now using a closed period.

For a plan using a closed period, there are two formats. Under a single-base approach, a plan has a single amortization base or layer, which ends on a specific date. Any increase or decrease in the UAL during the closed period is then reamortized over the remaining period in each valuation. KRS historically used a single, closed base, until SB 249 was enacted in 2020. One drawback to a closed period is that it can introduce some volatility in the final years, especially if a plan experiences a significant change in its UAL, which would need to be amortized over a shorter period. As a result, many plans have moved to using separate bases or layers, with individual amortization of an increase or decrease in UAL from a given year or source. Annual payments for each base or layer are added together for total UAL payment. TRS uses layered amortization, which it adopted in 2014, and KRS adopted a layered approach in its 2020 valuation.

Finally, a financing policy must adopt a method that is either level percentage of payroll or level dollar. Level percentage of payroll assumes a payment that is based on a fixed percentage of a growing payroll, whereas level dollar is comparable to a traditional home mortgage with flat payments across the entire period. Out of 50 retirement plans reviewed by LRC staff, 37 used the level percentage of payroll method. For Kentucky, KERS and CERS are required by statute to adopt a level percentage of payroll method, but the TRS board has adopted a level percentage of payroll method as a matter of policy. With its 2019 actuarial assumptions, the KRS board has adopted a 0 percent payroll growth assumption for KERS, making it, in effect, a level dollar payment. However, for CERS, the KRS board assumed 2 percent payroll growth. The TRS board has adopted a 3.5 percent payroll growth assumption.

LRC staff summarized the key findings from its review of the ways state retirement systems finance their UAL. New amortization periods are definitely shortening, but with legacy liabilities generally amortized over 30-year windows, closed periods are becoming the norm, and more plans are moving to separate amortization bases, primarily by year. The level percentage of payroll is still the standard method of amortization, but there has been a recent trickle of plans moving to the level dollar method. TRS and KRS have largely followed national trends in financing their respective UAL.

Kentucky Deferred Compensation Authority

At its August meeting, the Public Pension Oversight Board heard testimony from the executive director for the Kentucky Public Employees' Deferred Compensation Authority (KDC). KDC is the official supplemental retirement plan for all state employees, public education employees, and local programs that include local government employees.

Between January 2020 and August 2020, KDC's assets under management on all plans totaled \$3.1 billion. KDC's investment lineup is under certain and continuous quarterly review and is managed by an experienced investment subcommittee and an outside investment consultant.

Since legislative adoption and implementation in 2019, auto enrollment in KDC has been very successful. Under the auto enrollment program, all new full-time state employees hired after July 1, 2019, have a minimum of \$30 per month deducted from their pay to be placed in a money

market fund. Employees have 90 days to decide whether they want to remain in or opt out of the deferred compensation program. As of July 2020, KDC had had 3,869 participants enroll, with a 94 percent retention rate. Enrollment has increased by two-thirds since the inception of the auto enrollment program.

Community Mental Health Centers Pension Strategy

The Public Pension Oversight Board heard testimony at its September meeting from the executive director of the Kentucky Association of Regional Programs (KARP) regarding the participation of community mental health centers in the KERS nonhazardous plan. Community mental health centers (CMHCs) have served Kentucky since 1964, currently serve approximately 180,000 people annually, and provide a behavioral health public safety net for Kentuckians. KARP is a membership organization of 11 centers, 9 of which participate in the KERS nonhazardous pension plan.

In 2020, the General Assembly continued the freeze on the employer contribution rate for quasi-governmental employers, including CMHCs, at 49.47 percent. In addition, the General Assembly appropriated \$23 million to CMHCs, allowing the organizations to continue providing services. The same employer rate freeze and appropriation are necessary for the upcoming 2022 budget, and a future solution to rising pension costs is required in order for CMHCs to remain as a safety net for Kentuckians.

KARP proposed that the CMHCs' employer rate be calculated as the CMHCs' share of the KERS nonhazardous plan's unfunded plan as of the end of 2020 fiscal year amortized over a 30-year period with zero interest accrued. Further, KARP proposed that the General Assembly continue to appropriate \$23 million to the CMHCs annually to subsidize a portion of the employer cost. The CMHCs would pay for the balance along with the normal cost for active employees. Finally, the executive director advised that KARP had not yet opened discussions with KRS regarding its proposal.

Health Care Costs Reciprocity

The Public Pension Oversight Board heard testimony at its September meeting from staff from KRS and TRS regarding health premium subsidy costs for retirees with services in multiple retirement systems. Reciprocity across state-administered retirement systems allows members at the time of retirement to pull service from any system to establish eligibility for retirement and health insurance. Reciprocity is defined by statute.

When a member retires from multiple state-retirement retirement systems, each year during open enrollment, he or she may select the system from which to apply for health insurance. Service from both systems is used to determine how much of the premium is covered by each of the systems. Each system pays a percentage of the premium based on the percentage of service attributable to each plan, but the amount paid by each system cannot exceed 100 percent of the monthly contribution adopted by the respective boards of trustees.

Between TRS and KRS, there are approximately 5,500 retirees. Until 2017, the calculated reciprocity reimbursements between the systems was generally within a few hundred thousand dollars. Beginning in 2017, a major shift in retirees selecting KRS health insurance occurred, and the reimbursement amount started to exceed \$2 million annually. Further, KRS and TRS could not come to an agreement regarding the specific annual amount. However, KRS and TRS are in discussions, have agreed to meet, and are determined to resolve this issue by June 30, 2021.

KRS and JFRS share approximately 50 retirees with the Judicial Retirement Plan and fewer than 5 retirees with the Legislators Retirement Plan. KRS reimburses JFRS less than \$88,000 annually in health care subsidies for these members.

Chapter 6

Public Pension Oversight Board Recommendations

At its December 14, 2020, meeting, the Public Pension Oversight Board adopted legislative recommendations for the 2021 Regular Session of the Kentucky General Assembly and administrative recommendations for Public Pension Oversight Board staff.

For the 2021 session, the board approved the following recommendations:

- Enact legislation that converts the Kentucky Employees Retirement System nonhazardous employer contribution amounts from a payroll-based model to a liability-based model.
- Enact legislation to
 - amend Kentucky Revised Statute 6.350 to codify the LRC-approved changes requiring actuarial analyses on pension bills to evaluate the impact over 30 years (from 20 years) and requiring the analysis to be completed in a standardized format established by LRC; and
 - amend Kentucky Revised Statutes 21.440, 61.670, and 161.400 to require the state-administered retirement systems to provide a projection/analysis over a 30-year period rather than a 20-year period for projections in the annual actuarial valuation, experience studies, assumption changes, and other changes made by the boards of each system that are required by current law to have an analysis.
- Enact legislation that allows KRS retirees to change beneficiaries after retirement for eligible payment options and to select an adjusted survivorship payment option upon marriage or remarriage.
- Enact the KRS housekeeping measures.
- Enact the TRS housekeeping measures.
